

BAWA Presentation by KillenWOOD

Monday, June 11, 2018 10:27 AM

After a few comments on background and woodworking interests, I will be showing and describing several reproduction period pieces, two of which I will bring to the meeting. The two examples - small enough to bring - are a Sheraton Work Table and a Williamsburg Music Stand.

On a laptop, I will be demonstrating live how I use SketchUp to create detailed 3D models of these museum pieces from pictures and rough drawings. I will show how these 3D models are then turned into complete shop drawings with full size templates.

For reference, here is my YouTube Channel with over 300 videos on SketchUp and how it is used in shop work.
